

UTHERN A/L SU TIN

Software Development & Full-Stack Engineering

+6018-2174993 | utherndev@gmail.com | Kedah, Malaysia

PROFESSIONAL SUMMARY

Results-driven software professional with two years experience delivering full-stack solutions across microservices, backend engineering, API integration, and enterprise module development. Skilled in designing scalable architectures, optimizing backend performance, and building end-to-end features that support high-demand business operations. Experienced in developing CRM, loyalty, and fulfillment systems that strengthen automation, accuracy, and user workflow. Ready to leverage skills and experience to contribute effectively within the software development field.

PROFESSIONAL SKILL

- Full-Stack Development
- Microservices Architecture
- Backend Engineering
- API Integration
- Frontend Engineering
- System Architecture Design
- Database Design
- CI/CD Pipeline Development
- Enterprise Module Development
- CRM, HRM and ERP Development

KEY ACHIEVEMENT

- Developed a full Microservice Loyalty Program module end-to-end, including database design, backend logic, APIs, and complete frontend interfaces.
- Built an Order Fulfillment Management module with courier API integrations (DHL, NinjaVan, Poslaju) enabling automated airway bills and real-time delivery tracking.
- Delivered full-stack features for Digital Sales System modules, enhancing automation, purchasing flow, and system scalability.
- Contributed to CRM system development, creating APIs and UI components for points, voucher redemption, membership tiers, and purchase history tracking.
- Led the end-to-end development of a Warehouse Management System (WMS), including project planning, database architecture design, system development, and successful deployment.

PROFESSIONAL EXPERIENCE

Application Developer

Feb 2026 - Current

Tamarix Onesolutions Sdn. Bhd.

- **Full-Stack Application Development:** Delivered web applications and PWAs and System using Codeigniter, VueJS/NuxtJS, and Laravel PHP, enabling smooth feature delivery across frontend and backend.
- **Continuous Enhancement:** Performed continuous system enhancements and bug fixes for several modules for HRM, WMS, and CRM System to meet end user requirements and improve overall system performance and usability.
- **API Integration:** Integrated external APIs including Courier integration, Microservices, and payment gateways, ensuring seamless communication between platforms and internal systems.
- **Deployment:** Deployed applications to a shared hosting environment using FTP, while utilizing GitHub for version control, changes tracking, and collaborative development.

Web Developer, Contract

Dec 2025 - Feb 2026

Araken Sdn. Bhd.

- **Full-Stack Application Development:** Delivered web applications and PWAs using VueJS/NuxtJS, Laravel PHP, and GraphQL, enabling smooth feature delivery across frontend and backend.
- **API Integration:** Integrated external APIs including SSO Authentication, Microservices, and payment gateways, ensuring seamless communication between platforms and internal systems.
- **Deployment Automation:** Created CI/CD pipelines using GitLab and Jenkins, improving deployment consistency and reducing manual release effort.

- **Full-Stack Application Development:** Delivered web applications and PWAs using VueJS/NuxtJS, ReactJS, Laravel PHP, and GraphQL, enabling smooth feature delivery across frontend and backend.
- **Module Engineering:** Built payment processing, membership, event, and automation modules, translating requirements into functional features that improved system efficiency.
- **API Integration:** Integrated external APIs including CRM, eCommerce, microservices, and payment gateways, ensuring seamless communication between platforms and internal systems.
- **System Architecture Design:** Designed system architecture and optimized backend performance to support stable, high-volume operational environments.
- **Deployment Automation:** Created CI/CD pipelines using GitLab and Bitbucket, improving deployment consistency and reducing manual release effort.
- **Project Delivery Impact:** Completed major software modules through close collaboration with the team, resulting in reliable development, testing, and maintenance of web and mobile applications.

PROJECT EXPERIENCE

Microservice Loyalty Program Module

2024

Aafiyat Tech Sdn. Bhd.

- Developed a full microservice-based loyalty system covering backend logic, APIs, database design, and complete frontend configuration interfaces.
- Implemented automated reward calculations and subscription-period validation, strengthening marketing workflows and reward eligibility accuracy.

ERP System Modules

2024

Aafiyat Tech Sdn. Bhd.

- Built a real-time fulfillment workflow with courier API integrations for airway bill generation and automated delivery status updates.
- Delivered backend and frontend features that improved operational visibility from order creation to final delivery.

Digital Sales System Modules

2024

Aafiyat Tech Sdn. Bhd.

- Contributed to multiple digital sales modules across frontend and backend stacks, enhancing purchasing flow and automation.
- Improved system scalability through refined API handling and optimized module architecture.

WMS System Development

2026

Tamarix Onesolutions Sdn. Bhd.

- Led the end-to-end development of a Warehouse Management System (WMS), including project planning, database architecture design, system development, and successful deployment.
- Collaborated with Project Manager in developing WMS features for warehouse fulfillment process, picking & packing process, return, and write-off modules.

EDUCATION

Bachelor of Information Technology (Hons)

Ongoing

Open University Malaysia / CGPA: 3.60

Diploma in Information Technology

2023

Politeknik Sultan Abdul Halim Mu'adzam Shah / CGPA: 3.93

ADDITIONAL SKILL

- **Frontend Development:** Vue.js, Nuxt.js, React.js, Angular, Bootstrap, Tailwind CSS, Material UI
- **Backend Development:** Codeigniter, Laravel PHP, REST API, GraphQL, Microservices Architecture
- **Programming Languages:** HTML, CSS, JavaScript, Typescript, PHP, Java, SQL
- **Database & Server:** MySQL, PostgreSQL
- **API & Integrations:** CRM APIs, WMS APIs, eCommerce APIs, Payment Gateways, Courier APIs
- **Development Tools:** GitHub, GitLab, Bitbucket, Postman, SonarQube, Taiga, Putty
- **UI/UX & Prototyping:** Figma, Canva
- **CI/CD & Deployment:** GitHub CI/CD, GitLab CI/CD, Bitbucket Pipelines, Jenkins, FTP
- **Language Proficiency:** Malay, English, Mandarin, Thai
